A unique approach

A LEADER IN THE TREATMENT OF SUBSTANCE ABUSE, PORTAGE HAS EARNED INTERNATIONAL RECOGNITION FOR ITS TREATMENT METHODS TO HELP SUBSTANCE ABUSERS OVERCOME THEIR ADDICTION AND REINTEGRATE INTO SOCIETY. THE PORTAGE TREATMENT APPROACH IS BASED ON THE THERAPEUTIC COMMUNITY MODEL OF PEOPLE HELPING PEOPLE AND SELF-HELP. OVER 3000 ADOLESCENTS AND ADULTS HAVE BEEN TREATED IN PORTAGE'S FACILITIES IN THE PROVINCE OF QUÉBEC IN 2014.

USERS AND THEIR FAMILIES BENEFIT FROM AN ARRAY OF SERVICES FROM THE FIRST INFORMATION REQUEST UNTIL AFTER RESIDENCY IN THE THERAPEUTIC COMMUNITY. IN RESPONSE TO INCREASED DEMAND FOR SPECIALIZED PROGRAMMING, PORTAGE HAS DEVELOPED NEW PROGRAMS TO TREAT MOTHERS WITH THEIR CHILDREN, PREGNANT ADDICTS, ADOLESCENTS AND THE MENTALLY ILL SUBSTANCE ABUSERS.

2015-2016 FUNDRAISING CAMPAIGN

OBJECTIVE:
\$2,000,000

www.portage.ca

Statement of needs

Portage's programs are funded only in part by the Québec government. Support from the private sector is needed to offer the following services:

RESIDENTIAL PROGRAM FOR ADOLESCENTS - PRÉVOST ▶ \$400,000

Portage designed a specific program to treat adolescents in response to the increasing level of drug abuse among this age group. The program combines the proven techniques of the therapeutic community with progressive teaching approaches in the classroom. The program has a capacity of 40 beds. Case management and individual planning support the treatment process and its scope and duration.

RESIDENTIAL PROGRAM FOR ANGLOPHONE ADOLESCENTS ▶ \$275,000

Research showed that there were few treatment options for Anglophone adolescents in Montréal and throughout the province of Québec and in response Portage opened a treatment centre in Beaconsfield, in the West Island of Montréal. The centre offers the Portage program enhanced with an education component. The residential centre has a capacity of 32 beds. Case management and individual planning support the treatment process and its scope and duration.

RESIDENTIAL PROGRAM FOR ADOLESCENTS - SAINT-MALACHIE ▶ \$125,000

The residential centre houses 40 boys and girls, from 14 to 18 years of age, afflicted with substance abuse problems. The residential program is geared towards youth from the Eastern part of Quebec, more specifically, the Quebec city and Chaudière-Appalaches regions.

MOTHER AND CHILD PROGRAM ▶ \$150,000

The Portage Mother and Child Program is an innovative residential treatment option for pregnant addicts and substance abusing mothers. The program is designed to allow mothers to undertake a treatment program while maintaining the physical guardianship of their children. A team of professionals supervises the children and teaches them a range of behaviours appropriate to their ages.

MENTALLY ILL CHEMICAL ABUSERS (MICA) ▶ \$75,000

Portage has been working, for 20 years, with mental health professionals in several hospitals in the Montréal region and developed a residential treatment approach that was better suited to the cognitive impairments of this client group. The MICA program helps clients have a better understanding of themselves, preparing them for independent living within the community. This program is unique in Quebec.

OUTPATIENT SERVICES - MONTREAL CITY ▶ \$175,000

Portage offers a non-residential treatment program for male and female adults in the Montreal City region. The program provides client evaluation, treatment, vocational training, family and aftercare services. The day treatment program prepares the client for the residential phase and facilitates their integration resulting in increased program completion.

OUTPATIENT SERVICES - QUÉBEC CITY ▶ \$200,000

Portage offers a non-residential treatment program for male and female adults in the Québec City region. The program provides client evaluation, treatment, vocational training, family and aftercare services.

RE-ENTRY PROGRAM ▶ \$150,000

Portage provides its residents with a network of services that support the individuals in the process of returning to their natural environment. Individual and group therapies are essential components of this process of readjustment. Portage requires funds to support this non-funded stage of treatment.

FAMILY SERVICES ▶ \$150,000

Essential elements of Portage's treatment programs in the facilities are services for the families of residents. Through group and individual meetings, parents, spouses and partners learn to understand the issues of drug addiction and become an added source of support in the process of recovery.

PROGRAM DEVELOPMENT AND INNOVATION ▶ \$175,000

To better satisfy the need of its residents, Portage listens, adapts and constantly innovates its programs. Portage ensures their staffs undertake training programs for professional development.

RENOVATION AND EQUIPMENT ▶ \$75,000

Renovation of Portage's facilities is an ongoing requirement to ensure adequate and appropriate accommodation and to maintain health and safety standards.
